MICROFIBRE FLOOR PAD & CLOTH LAUNDERING

POLICY:

Microfibre products will be washed and dried after each use to maintain infection control best practices. Microfibre cloths and floor pads will be laundered separately from other soiled products.

PROCEDURE:

Washing:

- 1) Ensure microfibre pads and cloths are not washed with any other products.
- 2) Wash in cycle with no fabric softener as this affects the absorption of microfibre.
- 3) Remove from washer.

Drying:

- 1) Put in dryer and dry at low temperatures – do not exceed temperatures of 120°F (do not mix other products in dryer).
- 2) Ensure dry cycle has a cool down cycle of 6-10 minutes and that cool down cycle is run in its entirety.
- 3) Remove cloths from dryer and place in a wire bin to allow air to circulate for quicker, complete cool down. Do not put any other products into wire bin during cool down period.
- 4) Store microfibre cloths and stack floor pads ready for use the following shift.
